GARAGE VENTILATION SYSTEM

Humidex GVS-SD – With Carbon Monoxide Detection

Garage and multipurpose moisture control ventilation system

The new Humidex GVS-SD unit detects the presence of dangerous levels of carbon monoxide in your garage, and starts working immediately to eliminate it and make your garage safe and comfortable again.

This new and intelligent unit will constantly monitor the humidity, the temperature, and the carbon monoxide of the indoor air. This will allow the system to get rid of excess air pollutants and dangerous fumes, thus ensuring the best conditions in a garage, workshop, or other small, confined space.

Humidex GVS-SD Model Shown

Garage Ventilation System **ADVANTAGES**

- A Built-in Carbon Monoxide sensor is used to analyze concentration levels and help evacuate them
- Easy to install, effortless to maintain, and never any water to empty
- Set it & forget it
- Suitable for both heated and unheated spaces
- Energy-efficient with very low electricity consumption
- Quiet, impact-resistant, compact, and automatic

Garage Ventilation System **BENEFITS**

- Detect, alert, and evacuate carbon monoxide
- Exhausts excess humidity, fumes, and other contaminants
- Reduces mold, mildew, and musty odors
- Protects your tools and equipment from rusting
- Removes condensation from windows
- Helps dry puddles and snow from garage floors

Humidex Garage Ventilation System (GVS-SD)— specifically designed for garages, sheds, baby barns, greenhouses, and all confined areas of up to 750 square feet.

Your Humidex GVS-SD will monitor any increase in humidity and automatically maintain an optimum moisture level.

Maintaining a consistent humidity level will result in less cracks and leaks, which means lower maintenance costs.

Improve ventilation and get rid of excess humidity, air pollutants, and dangerous fumes with our garage and multipurpose moisture control system.

Garage Ventilation System - Technical Information

Dimensions	9" W x 6.5" H x 4" D
Weight	2.4 lbs
Electrical	31 W Max / 115 V @ 60 Hz
Air Flow	75 CFM
Capacity	Serves up to 750 square feet

Warranty	2 years
----------	---------

The EPA and CMHC both recommend a garage ventilation system for homes with an attached garage to reduce the potential for toxic fumes entering your home. Our quiet, compact, and impact-resistant garage unit has proven it can accomplish this for only pennies a day.

Our new garage ventilation system monitors both humidity and temperature in your space. These readings are used to analyze trends and calculate the optimal extraction rate to achieve the very best indoor air quality conditions possible.

- No more wet windows & floors
- Reduces mold, mildew, odors, and contaminants
- Analyzes the temperature trend to reduce heat loss
- Energy-efficient design, runs quietly for just pennies a day
- It's easy to install — Simply follow our step-by-step guide
